

**HISTORY:**

Since starting out in 2011, Pro Solar's team has doubled to a current staff of twenty. We are the only company in Belize offering renewable energy solutions in solar, wind or hydro. Pro Solar now proudly offers cutting-edge technology of Tesla Solar Powerwall systems to its quality line of products. Pro Solar is the only Tesla Certified Solar installer in Belize and the region.

VISION:

Pro Solar Engineering Ltd. aspires to foster the development of a self-sufficient and energy independent Belize by reducing its carbon footprint one installation at a time.

MISSION:

Pro Solar Engineering Ltd. aims to promote socio-economic development in Belize by supplying dependable and affordable renewable energy solutions.

WHO WE ARE

Pro Solar Engineering is a Belizean company that offers renewable energy turnkey solutions based on the careful analysis of the client's needs. We listen and understand what our clients want and design solutions to fill their requirements. We earn our client's trust and establish long lasting friendships. Pro Solar Engineering also has a cadre of professional support from the quality brands we represent, offering the latest and best options to our clients.

OUR VALUES

Integrity - We conduct business and our operations in an upright & honest manner; following the laws of Belize, and promoting socio-economic development.

Respect - We respect and treat our employees, customers, stakeholders, and everyone directly or indirectly correlated with the company fairly, regardless of race, ethnicity, religion, gender, age, etc... We respect our client's privacy and keep their information confidential at all times.

Commitment - We are committed to the development of Belize, our employees, our company, our society and the community in which we operate.

Community, Social & Environmental Responsibility - We are concerned about the environment and the communities in which we operate. We are dedicated to the promotion of a self-sustainable country whilst instilling a climate-resilient culture.

Innovation - Pro Solar's focus and efforts on research & development ensure we constantly improve our products, our customer service and our business processes.

WHAT WE OFFER

Pro Solar Engineering offers well designed and professionally installed systems as well as thorough preventative maintenance services for the systems offered. Not only do we use reputable products, but we also provide manufacturer's warranties in the installations completed by our trained technicians.

RENEWABLE ENERGY PROFESSIONALS

Our technicians have decades of combined experience in system installation and engineering design. These certified engineers and technicians understand our client's investment and what is necessary to have their state-of-the-art system functioning to its fullest capacity. We are always willing to be of assistance in any way possible and pride ourselves in our incomparable customer service.
